Healing Colon, Liver And Pancreatic Cancer (The Gerson Way)

Synopsis

Max Gerson, the originator of the holistic nutritional therapy now known as The Gerson Therapy, was born in Wongrowitz, Posen, Germany (now Poland) in 1881. Throughout his German university and medical education, he suffered terribly from migraine headaches, which neither her nor any of his professors could alleviate. Assigning himself the project of curing his own debilitating headaches, Gerson eventually discovered that by varying his diet, he could prevent the problem. When he discovered that his "migraine diet" would also cure cases of tuberculosis, his otherwise fine medical career became highly controversial. Gerson persevered, however, always searching for the underlying cause of disease. When a patient with cancer came to see him for treatment, he was able to cure her with his therapy, contrary to his own expectations. Gerson's blossoming career was interrupted in 1933 when he and his family had to flee Nazi Germany. They fled to the United States and settled in New York City, where, intrigued by his early success, Gerson took up the problem of cancer, achieving a reputation among patients, if not among his jealous colleagues, of being able to cure many of the most advanced degenerative cases. This booklet contains an Introduction to, and synopsis of Dr. Gerson's treatment, plus real patient histories, some in the patients own inspiring words, about their experiences and successes with the Gerson Therapy.

GREAT READ

Great book. Has testimonies as well as treatment protocol.

This is like a tiny, short brochure that would normally be labeled "Free, Take One" in a lobby. All this does is advertise actual books with cover photos and short synopsis and give you information on how to mail order them. Just a fair warning I wish I had before I spent \$10 (with shipping) on this.

Very informative.
