The Skin Cancer Breakthrough Program

Synopsis

Well over one million cases of skin cancer are diagnosed yearly in the United States alone.

Malignant melanoma by far the most dangerous and potentially lethal is increasing at an alarming rate. Why are more people getting skin cancer and who is really at risk? The Skin Cancer Breakthrough Program attempts to answer these questions while examining the environmental as well as the dietary and nutritional factors that may determine an individuals risk of getting skin cancer as well as premature aging of the skin and wrinkles. Revealing and disturbing, Proactive and optimistic this book is certain to leave you thinking about long held beliefs and notions, offering a new perspective about what you can do to reduce the threat and help to prevent skin cancer and its recurrence.

Customer Reviews

This book was easy to understand and I purchased 7 copies for my friends. I had no idea that skin cancer was so prevalent. Educate your children about how damaging the sun is. Teach them what to put in their body as well as what to put on it.
