## Synopsis

Like the Visual Encyclopedia series, Visual Encyclopedia of Ships is a chronological guide to more than 1000 of the most important ships from the earliest times to the present day. From the Viking longship through the 16th century galleon to the super carriers and nuclear submarines of the twenty first century. This book includes every conceivable type of ship in which man has gone to sea. As well as warships from every century, this book also examines those vessels that have explored the globe, conducted trade, and afforded great adventure, luxury and entertainment. From the smallest coastal traders up to the vast oil traders of today, from the graceful clippers of the nineteenth century to modern passenger lines. This is a comprehensive guide to all the world's ships, both military and civilian. Each ship is illustrated with a profile illustration, accompanied by brief details and specifications, and vessels are arranged chronologically to allow easy comparisons. With 1000 outstanding color illustrations, this book is an essential reference guide for all maritime and ship enthusiasts.

## Customer Reviews

I found this book to be a disappointment since I had expected more photographs to be intertwined with the illustrations. In addition, the classification of ships was disorganized in my opinion (for example, I would expect the Nimitz class aircraft carrier and its variations to be grouped all in the same section, instead of being split up in two).

This book is packed full of information and illustrations. Any one who loves boats will LOVE this book. Great coffee table book!

Very good !

Not in details for specification.
