The Ancient Giants Who Ruled America: The Missing Skeletons And The Great Smithsonian Cover-Up

Synopsis

A study of the substantial evidence for a former race of giants in North America and its 150-year suppression by the Smithsonian Institution • Shows how thousands of giant skeletons have been found, particularly in the Mississippi Valley, as well as the ruins of the giants' cities • Explores 400 years of giant finds, including newspaper articles, first person accounts, state historical records, and illustrated field reports • Reveals the Stonehenge-era megalithic burial complex on Catalina Island with over 4,000 giant skeletons, including kings more than 9 feet tall • Includes more than 100 rare photographs and illustrations of the lost evidence Drawing on 400 years of newspaper articles and photos, first person accounts, state historical records, and illustrated field reports, Richard J. Dewhurst reveals not only that North America was once ruled by an advanced race of giants but also that the Smithsonian has been actively suppressing the physical evidence for nearly 150 years. He shows how thousands of giant skeletons have been unearthed at Mound Builder sites across the continent, only to disappear from the historical record. He examines other concealed giant discoveries, such as the giant mummies found in Spirit Cave, Nevada, wrapped in fine textiles and dating to 8000 BCE; the hundreds of red-haired bog mummies found at sinkhole • cenotes • on the west coast of Florida and dating to 7500 BCE; and the ruins of the giants' cities with populations in excess of 100,000 in Arizona, Oklahoma, Alabama, and Louisiana. Dewhurst shows how this suppression began shortly after the Civil War and transformed into an outright cover-up in 1879 when Major John Wesley Powell was appointed Smithsonian director, launching a strict pro-evolution, pro-Manifest Destiny agenda. He also reveals the 1920s' discovery on Catalina Island of a megalithic burial complex with 6,000 years of continuous burials and over 4,000 skeletons, including a succession of kings and queens, some more than 9 feet tall--the evidence for which is hidden in the restricted-access evidence rooms at the Smithsonian.

Book Information

Paperback: 368 pages

Publisher: Bear & Company; 1 edition (December 27, 2013)

Language: English

ISBN-10: 1591431719

ISBN-13: 978-1591431718

Customer Reviews

Running the site "Ghost Hunting Theories," I have spent a great deal of my focus on the unexplained in the realm of the ancient giants. I've read so many books and articles on the subject and written so many postings about it, that I felt like I knew a good deal; until I read this book. "The Ancient Giants Who Ruled America: The Missing Skeletons and the Great Smithsonian Cover-Up" by Richard J. Dewhurst is my most prized book in my entire library (and I like to collect reference books). It has photos, tons of articles and documents, information about every aspect of the ancient giants you can't find anywhere else. Some people tell you their heights, some tell you the tools they had, or that a certain amount of them were found in a certain city, but this book goes into great specificity. It also ponders the obvious cover-up of this precious anthropological information and the potential ancient history of this race of people. It was brilliantly laid out, a super incredible read. In fact, I literally stayed up the night and read it. I could not put it down! I think I highlighted nearly every page with a highlighter marker and dog-eared a lot of pages. I love this book and that says a lot from a woman who is very critical about the books she considers worthy of her precious time. I highly recommend this as THE book on your shelf in regards to ancient giants.

I pre-ordered this book way back in September and could hardly wait until it was released at the end of December. I find this book incredibly well-researched and comprehensive. The book starts with Mr. Dewhurst's theories as to why the Smithsonian has been running a scam for over 100 years now with regard to the giant skeletons found in graves all over the US, and delves deeply into the articles that detailed the giants found all over the US in mounds, graves, bogs, etc.....I have thoroughly researched this topic but still learned quite a bit, though I'm nowhere near done reading the book. However, so far I'm impressed with the thorough hand and thought Mr. Dewhurst has put into this jewel. He has categorized his chapters into various relevant topics and not only talks about the giants, but talks about the copper mined here thousands of years ago (something I've only heard Scott Wolter speak about on America Unearthed), (relevant) hieroglyphs, tablets, and other topics relating to the giants (many giants were adorned with copper crowns and such). This would be the best and most comprehensive guide to the topic of pre-Columbian US history and giant

skeletons, providing a plethora of news articles detailing these finds that have all but vanished from the annals of history. A debt of gratitude is due Mr. Dewhurst for tackling this topic with honesty and clarity. Thanks Mr. Dewhurst. I will recommend your book to all interested in this topic.

Quite an interesting book with all the evidence for North American giants in one place. (What about South America?) This along with: SCATTERED SKELETONS IN OUR CLOSET KAREN MUTTON 2011 lists evidence that challenges the mainstream archaeological paradigms (as do many serious books of archaeological heresy, some going back more than 50 years). One hopeful sign that the old guard paradigms are coming down is the History 2 channel's program "America Unearthed" with forensic geologist Dr. Scott Wolter. He has proven that many so called "hoaxes" (Kensington Rune Stone, Anubis Cave, Tucson Artifacts, Newport Tower, Las Lunas stones, etc.) are authentically ancient and show pre-columbian contact between the Americas, Africa/Eurasia, Pacific Ocean cultures, etc. dating back many millennia and down to historical times. NOTE TO SMITHSONIAN SCIENTISTS & POLICYMAKERS: Just because John Wesley Powell set the paradigm for "no old world contact before Columbus" except the Vikings in the latter 19th century doesn't mean you have to still adhere to it; it's outdated, obsolete, scientifically unsound, and extremely elitist. The world and science have changed drastically since then, and too many people realize that you are lying about what you have in storage. So open up your hidden collections and let qualified scholars investigate and analyze the artifacts and remains, and publish their findings without threat of loss of reputation and funding.

Early settlers, as they moved out across America and began farming the land, produced hundreds of reports on giants. Skeptics claim they are all hoaxes or frauds or animal bones. Trouble with this reasoning are these points: 1. Who was getting rich and famous off these reports? No one. 2. People knew the difference between human and animal bones. Some of the old reports talk about both. 3. Are we to believe that this giant-hoax-conspiracy went on for decades and decades? Yes, there were known hoaxes. Newspapers occasionally purposefully wrote fake articles. But here the author has gathered together one of the biggest collections of giant reports from these papers in one place. Do they seem like hysterical, tabloid articles? Or are most of them just reporting the news? The only thing Dewurst doesn't do is a lot of analysis or commentary on the reports or in-depth history background. Nor do we investigate the Smithsonian angle that deeply. Go elsewhere for that, but get this book for your references. For more on early America's past, see
